

XM radio SHOULD be allowed to continue to offer traffic and weather to its subscribers. I choose to PAY the subscription fee each month so I can get instant traffic information. If my local broadcasters gave me traffic information that was worth a damn, I would obviously choose to save the money and listen to them for free, but THEY DON'T. I need somewhere I can jump to quickly for instant traffic information and should not have to wait for the local broadcaster to get to another traffic report. By that time, I'm already locked into what road I have to take. I spend much less time sitting in traffic jams since I got XM with instant traffic. The local broadcasters don't want to offer this to me, and are now trying to stop anyone else from offering it to me as well?! You have got to be kidding, especially since I have to PAY XM for this!!!!
